

Dear Bureau of Indian Affairs:

I'm writing today regarding the IEED, Indian Energy Economic Development, study regarding rights of way (ROW) on Indian Tribal Lands.

I would like to see the issue of right of ways in negotiations with energy companies to preserve the doctrine of Tribal consent in energy rights of way negotiations on Tribal lands. There should be no fear of increased energy costs.

In fact, moving any Tribal negotiation toward the idea of sustainable energy, possibly eliminating future right of way issues, could decrease future energy costs.

Sincerely,
